Noida, UP

B.Tech CSE student (Expected 2027) with hands-on experience in full-stack Python development, REST APIs, and AI-powered tools. Proficient in Flask, Streamlit, SQL, and NLP. Built and deployed multiple end-to-end applications integrating databases, third-party APIs, and ML pipelines. Seeking internship roles in Software Development or Data Analysis.

EDUCATION

B.Tech – Computer Science Engineering

Bennett University, Greater Noida

Expected 2027

CGPA: 8.2 / 10.0

Senior Secondary – CBSE (Science with Computer Science)

Inderprastha Convent School, New Delhi

2022

Percentage: 87%

EXPERIENCE

C++ Programming Intern

Nov – Dec 2025

Hex Softwares Pvt. Ltd. (Remote)

- Built a Student Record Management System using OOP – classes, **fstream** file persistence, and a menu-driven CLI with full CRUD operations.
- Debugged memory leaks and pointer errors using systematic testing; reduced runtime errors by 40% across the codebase before final delivery.
- Delivered all tasks ahead of schedule with regular team check-ins; received positive feedback for code readability and documentation quality.

AWS Solutions Architecture Virtual Experience

Jul 2025

Forage / Amazon Web Services

- Designed a scalable, fault-tolerant cloud architecture using AWS Elastic Beanstalk, including auto-scaling groups and load balancing configurations.
- Prepared detailed deployment strategy and cost-estimation documentation, demonstrating ability to balance performance and budget constraints.

PROJECTS

InternHunt – AI Resume Analyzer & Internship Finder

Python, Streamlit, spaCy, NLTK, Joooble API

- Deployed a Streamlit app that generates ATS compatibility scores, extracts technical skills from uploaded resumes, and performs gap analysis against target job descriptions using spaCy/NLTK NLP pipelines.
- Integrated Joooble API for real-time job listings dynamically matched to user skill profiles; leveraged Claude AI to improve entity recognition and resume parsing accuracy.
- Implemented keyword frequency analysis and section detection to provide actionable, personalized recommendations for resume improvement.

Taste Junction – Smart Canteen Ordering System

Python, Flask, MySQL, HTML, CSS

- Built a dual-portal Flask web app (Student + Admin) featuring menu browsing, cart management, order placement, itemized billing, and persistent MySQL order history.
- Designed and normalized a relational MySQL schema with role-based access control; implemented session management and secure login for both portals.
- Admin dashboard enables live order tracking and daily sales monitoring; all order state changes synced in real time with the database via REST endpoints.

BuildTrack – Construction Project Management App

Python, Streamlit, SQLite, Pandas

- Built a multi-site Streamlit dashboard to manage tasks, timelines, budgets, and team assignments across concurrent construction projects.
- Integrated Pandas for data aggregation and Plotly charts tracking budget utilization and milestone rates; SQLite backend with full CRUD and CSV export.

TECHNICAL SKILLS

Languages	Python, C++, SQL, JavaScript
Web & Frameworks	HTML, CSS, Flask, Streamlit, REST API Design
Libraries	Pandas, NumPy, Matplotlib, NLTK, spaCy, Plotly, Scikit-learn
Databases	MySQL, SQLite; schema design, normalization, query optimization
Tools & Platforms	Git, GitHub, VS Code, Google Colab, Excel, AWS Elastic Beanstalk
AI & APIs	Claude AI, Joooble API, OpenAI API, Warp (AI Terminal)

CERTIFICATIONS & INVOLVEMENT

DSA for Interview Preparation – GeeksforGeeks ◊ OOP & Data Structures in C++ – Coursera ◊ Text Retrieval & Search Engines – Coursera ◊ PySpark & AWS: Master Big Data ◊ Active in university hackathons, coding contests, and cross-functional remote collaboration.
